

VERMIGRO

EARTH WORM CASTING TEA

APPROVED FOR ALL ORGANIC, EU AND IFOAM APPLICATIONS

A relatively new twist on the use of compost is earthworm casting tea. A liquid extract of composted feedstocks digested and enhanced by earthworms into rich, odorless castings. These castings are “brewed” and fortified with nutrients resulting in a super concentrated liquid that supercharges the soil.

There are many years of proven testimonials/results centered on this amazing product and the word is finally getting around....

VERMIGRO Worm Tea can actually increase both plant size and plant yield. This is due to interaction of worm tea microbes with the soil microbes and protozoa interacting with the soil particles as well as the root system of the plant itself.

Plants that grow in soil treated with VERMIGRO Worm Tea receive far more nutrition than in soil alone. The microbes in worm tea turn organic matter into humus storing energy for later use which is soluble and always available for the plant when needed.

Studies have shown that with continued applications of quality earthworm tea the soil will become stronger in each successive year which will typically result in higher and more consistent yields.

VERMIGRO Worm Tea can be used as a soil drench applied through the drip irrigation system or as a foliar spray and is excellent in combination with earthworm castings, compost and as a compliment to most anything else in your existing program.

VERMIGRO Worm Tea also helps retain nitrogen and other nutrients such as calcium, iron, phosphorus, potassium, etc. also produce hormones that help plants grow. These conditions represent an ideal environment for extracting and growing beneficial microorganisms and for extracting the nutrient micronutrients as well as other plant-beneficial organic compounds present in worm castings.

VERMIGRO WORM TEA SAVES AND MAKES YOU \$\$

Whether you are a small, medium or large grower you can benefit by applying VERMIGRO Earthworm Tea. And all types of crops benefit from VERMIGRO including: wine and table grapes, citrus, vegetables, berries, fruit, nuts, sports turf and more.....

As the price of fertilizer continues its upward climb, it requires a careful examination as to how and where our \$\$ is being applied. And what's the real return on that hard earned \$\$ investment?

We can show you how you can allocate a portion of your annual fertilizing budget into a more efficient application and how this decision will not only increase your crop yield but how it will make your fields more viable and save you \$\$ in the years to come.

By utilizing concentrated VERMIGRO Worm Tea applications you will soon realize savings and yields that may have previously been thought to be unattainable. It's not magic but just good old school biology coupled with today's science that fortifies the soil; both in the short and long term.

This concentrated liquid compost extract is teeming with live beneficial microorganisms and is the best way we've found to "feed the soil". We now know that a healthy soil environment is the key to healthy plants. A healthy soil is alive with beneficial microorganisms. These microorganisms are responsible for producing robust, more resistant to insect and disease problems that are more productive and able to withstand extremes in temperature and moisture.

VERMIGRO Worm Tea is a biologically concentrated liquid compost extract. It contains soluble nutrients from the earthworm castings, but more importantly, an enormous diversity of bacteria, fungi, protozoa and nematodes are extracted and encouraged to grow to incredibly high numbers.

And as the manufacturer we can custom blend your "brew" so it addresses your lands needs specifically by adding the exact organic nutrients which means you can get maximum results as quickly as possible. Contact us today for more information and your no cost, no obligation price quote.

VERMIGRO products are manufactured by Salton Sea Farms, exclusively distributed by Earthworm Organics LLC, with operations based in Thermal, CA. Contact: Gary Nichols (760) 809-9386 or John Beerman (760) 275-1306 for your specific application and pricing needs.
