

Vermigro™

APPROVED FOR ALL ORGANIC, EU AND IFOAM APPLICATIONS

WHY USE COMPOST TEAS?

Some of the benefits of using compost tea include:

- ◆ **Increases disease suppression**
- ◆ **Provides nutrients for plants and food resources for microbes**
- ◆ **Inoculating microorganisms into the soil or on to leaf surfaces increases cycling nutrients into plant available forms**
- ◆ **Increases the nutritional quality of plant produce**
- ◆ **Reduces the negative impacts of chemical based pesticides, herbicides and fertilizers on beneficial microbes in the root system**
- ◆ **Improves plant growth and increases root mass**
- ◆ **Makes fertilizer more effective by increasing plant uptake of nutrients**
- ◆ **Improves the plants ability to withstand stress**
- ◆ **Custom “brews” address specific plant needs**

Vermigro *compost teas should always be used as soon as possible after delivery. Because compost tea is a “live” product it needs to be in the soil as soon as is possible. Long delays in application will seriously impact the effectiveness of compost teas.*

Vermigro compost teas contain extracts of High Quality Earth Worm Castings plus the following additives: **Kelp, Molasses, Yucca Extracts, Fulvic Acid and Phytamin 800**

Vermigro formulates both soil compost tea and foliar compost tea. **Vermigro** will be happy to provide Organic Certifiers with a full list of compost tea ingredients. Wherever possible, OMRI listed ingredients are used in the production of the teas.

Vermigro is manufactured by Salton Sea Farms Inc. and exclusively distributed by Earthworm Organics, LLC. Contact: Gary (760) 809-9386 or John (760) 275-1306
